

User Acceptance Testing (UAT) Template

Date	12-07-2026
Team ID	SWTID-2026-9948
Project Name	Heart Disease Analysis
Maximum Marks	

Project Overview:

Project Name: Heart Disease Analysis

Project Description: An interactive Tableau dashboard analyzing heart disease, stroke and diabetes risk factors using demographic (Gender, Race, Age Category), lifestyle (Smoking, Alcohol Drinking) and health (BMI, General Health) data, to help identify high-risk population groups.

Project Version: 1.0

Testing Period: 05-07-2026 to 12-07-2026

Testing Scope:

- Dashboard visuals: Gender vs Heart Disease, Diabetic vs Heart/Stroke, Race-wise Heart Disease, Smoking & Alcohol Risk Factors, General Health vs Heart Disease, Age & BMI vs Diabetic, and the Heart Disease/Diabetic Status/Age Category breakdown.
- Filters/slicers for Age Category, Gender, Race, Diabetic Status, Smoking, Alcohol Drinking, General Health, Heart Disease and Stroke.
- Story navigation (Previous/Next) across dashboard pages.
- Requirement: users must be able to filter and cross-reference heart disease/stroke counts by any combination of demographic and lifestyle factors, with visuals updating accurately and within acceptable load time.

Testing Environment:

URL/Location: Tableau Public workbook - Heart Disease Analysis Dashboard

Credentials (if required): Not required (publicly viewable dashboard)

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Verify Gender vs Heart Disease chart displays correctly	1) Open dashboard 2) View Gender vs Heart Disease bar chart 3) Compare Male/Female counts	Chart displays accurate counts for Male and Female heart disease cases		
TC-002	Verify Age Category filter updates all visuals	1) Select an Age Category (e.g. 55-59) 2) Observe all charts	All visuals refresh to show data only for the selected age category		
TC-003	Verify Race-wise Heart Disease pie chart accuracy	1) Hover over each pie segment 2) Check percentage values	Percentages match underlying data (e.g. White 75.57%, Black 17.81%, Hispanic 3.73%)		
TC-004	Verify Smoking & Alcohol Risk Factors chart	1) Toggle Smoking = Yes/No and Alcohol Drinking = Yes/No 2) Check Count of Heart Disease bars	Bars update to reflect correct heart disease counts for each combination		
TC-005	Verify Age & BMI vs Diabetic heat grid	1) Locate an age band cell 2) Check displayed Avg. BMI value and color scale	Avg. BMI value falls within displayed legend range (23.91 - 42.78) and color matches value		

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-006	Verify story navigation (Previous/Next)	1) Click Next on dashboard 1 2) Click Previous to return	Navigates smoothly between dashboard pages without errors or data loss		
TC-007	Verify dashboard performance under multiple filters	1) Apply 3-4 filters simultaneously 2) Observe response time	Dashboard updates within an acceptable time (under 3-5 seconds) without freezing		

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
